Education

ED 3330 - Children's Literature

Credits: 4

An introduction to the study of literature for children in the pre-school and elementary grades. The course includes, selection and evaluation of books for children; language development through children's literature; use of literature to promote the social, emotional and creative development of children; integrating children's literature into the content areas; planning story activities. Opportunities to work with children ages 3-7 where feasible.

Prerequisites

EC1; EC II Recommended: ED 3700 - Child Development

as prerequisite or co-requisite

When Offered:

Occasionally.

ED 3700 - Child Development

Credits: 4

Provides students with background information concerning the intellectual, physiological, social, emotional, and creative development of children from birth through the elementary school years. Emphasis is given to the contributions of Piaget, Gardner and other developmental theorists. Practical relevance of child development information is stressed throughout this course for students who plan to work with children. Students will participate in a practicum in a field-based classroom to gain experience with children in an educational setting and to reflect upon teaching as a career.

Prerequisites

EC1; EC II

When Offered:

Each semester.

ED 3742 - Middle Childhood and Adolescence

Credits: 4

Examines human development from six years through adolescence. Research and theories concerning physical, cognitive, personality and social development will be reviewed. Family, peer groups, schools and media will be discussed. The impact of socioeconomic background, culture, race and gender will be discussed throughout. The use of theories and research in applied settings will be discussed.

Prerequisites

EC II

When Offered:

Every semester.

ED 3800 - Human Development and Learning

Credits: 4

This course focuses on the development of learners from birth through adolescence, their phases of learning, their intellectual, social, and emotional growth, character development, individual differences, interests, attention, potential challenges, and motivation. Candidates will examine how these aspects of human development relate and influence the teaching and learning process. 15 hours of field experience required.

ED 3820 - Foundations of Special Education

Credits: 4

This course offers an introductory overview of the field of special education across the lifespan, which includes the investigation of the development, nature, causes and characteristics of young children and adolescents with special needs. Consistent with the knowledge base of the field, the course is based on an interdisciplinary perspective. We will

review an extensive body of information that relates to five broad topics: history of the field, basic notions, current trends, and exceptionality categories and instructional technology. Some of the basic notions include philosophical and legal foundations, structure of the service delivery system, instructional approaches and technology, and work with families. Current trends will focus on minority representation, inclusion, and standards. Additionally, this course will engage candidate in curriculum development across disability categories with a focus on the integration of appropriate instructional technology. Lastly, definitions, prevalence, causes, assessment, characteristics, educational and instructional technology considerations for several exceptionalities, and international perspectives will be studied. 15 hours of field experience required.

Prerequisites

English Comp I and II with a B or higher

When Offered:

Every semester.

ED 3900 - Foundations of Education

Credits: 4

This course will offer an introduction to the world of teaching, as it examines the basic theories of learning and teaching across educational environments for the birth-12 learner. Specifically, the course encourages deeper understanding of the educator and student in relation to others; it engages in an exploration of the social/historical/political contexts that affect education and teaching; the significant characteristics that diverse student populations bring to the classroom; and the related issues of curriculum and pedagogy across the lifespan. Over the course and cumulatively, we consider what it means to be a reflective educator.

Prerequisite/Corequisite

- English Comp I - C grade or higher
- English Comp II- C grade or higher
- MA 1020 **and/or** 2nd Math course: MA 2000, 2050, 2010, 2080, 2090, MA 8998- C grade or higher
- ED 3700- Grade C or higher
- 92 credits - Course is only open to Sophomore, Junior and Seniors.
- 3.0 GPA

When Offered:

Every semester.

ED 4082 - Methods and Materials of Teaching Mathematics

Credits: 4

This course is a study of the strategies, techniques, materials, and technology used to teach mathematics to middle childhood and high school students. Candidates will become acquainted with New York State learning standards involved in teaching mathematics at the secondary school level, develop an awareness of the professional environment, and of resources and information available for teachers. There will be a strong focus on unit and lesson planning, assessment methods, interdisciplinary connections and differentiated instruction. The co-requisite Observation course provides an opportunity for candidates to observe and interact with teachers and students in a secondary field placement setting, and to reflect on these experiences.

Prerequisites

Admission to SOE; ED 3900

and ED 3820

or ED 3742

When Offered:

Every Spring.

ED 4083 - Methods and Materials of Teaching Spanish

Credits: 4

This course is a study of the strategies, techniques, materials, and technology used to teach Spanish to middle childhood and high school students. Candidates will become acquainted with New York State learning standards involved in teaching Spanish at the secondary school level, develop an awareness of the professional environment, and resources and information available for teachers. There will be a strong focus on unit and lesson planning, assessment methods, interdisciplinary connections and differentiated instruction. The co-requisite Observation course provides an opportunity for candidates to observe and interact with teachers and students in a secondary field placement setting, and to reflect on these experiences.

Prerequisites

Admission to SOE; ED 3900

and ED 3820

or ED 3742

When Offered:

Every Spring.

ED 4085 - Methods and Materials of Teaching Science

Credits: 4

This course is a study of the strategies, techniques, materials, and technology used to teach science to middle childhood and high school students. Candidates will become acquainted with New York State learning standards involved in teaching science at the secondary school level, develop an awareness of the professional environment, and resources and information available for teachers. There will be a strong focus on unit and lesson planning, assessment methods, interdisciplinary connections and differentiated instruction. The co-requisite Observation course provides an opportunity for candidates to observe and interact with teachers and students in a secondary field placement setting, and to reflect on these experiences.

Prerequisites

Admission to SOE; ED 3900

and ED 3820

or ED 3742

When Offered:

Every Spring.

ED 4086 - Methods & Materials of Teaching Social Studies

Credits: 4

This course is a study of the strategies, techniques, materials, and technology used to teach social studies to middle childhood and high school students. Candidates will become acquainted with New York State learning standards

involved in teaching social studies at the secondary school level, develop an awareness of the profes sional environment, and resources and information available for teachers. There will be a strong focus on unit and lesson planning, assessment methods, interdisciplinary connections and differentiated instruction. The co-requisite Observation course provides an opportunity for candidates to observe and interact with teachers and students in a secondary field placement setting, and to reflect on these experiences.

Prerequisites

Admission to SOE; ED 3900

and ED 3820

or ED 3742

When Offered:

Every Spring.

ED 4121 - Methods and Materials for Teaching Elementary Science

Credits: 4

This course is designed to develop pre-service teachers' skills and abilities in teaching science to preschool and elementary school learners through inquiry and investigations. Emphasis is placed on how children learn science, lesson planning, assessment of students' scientific reasoning, safety practices, issues of diversity, and application of technology in relation to New York State and National Science Standards.

Prerequisites

Admission to SOE, ED3700, ED3900 and proficiency in mathematics; completion of laboratory science.

When Offered:

Fall

Spring

ED 4122 - Methods and Materials for Teaching Elementary Math

Credits: 4

This course is designed to introduce principles, methods, and materials for teaching mathematics to diverse learners in an early childhood and elementary classrooms. Emphasis is placed on how children learn mathematics, teaching through problem solving and children's literature, using different modes of representation including technology to develop relational understanding and procedural fluency, principles of effective mathematics teaching, and Standards for Mathematical Practice. Participants will develop the core ideas and methods of learning, teaching, planning, and assessment in relation to State and National Mathematics Standards. Perspectives of how children learn mathematics and issues of diversity is discussed.

Prerequisites

Admission to SOE, ED3700, ED3900, MA 1020 and a second math course

When Offered:

fall

spring

ED 4200 - Literacy for All Students

Credits: 4

This course will examine theory, research, and practice of literacy learning and teaching. Special attention is given to the theoretical reading models, developmental stages of literacy, literacy skills and strategies, literacy assessment, planning for English Language Learners, and integration of learning and teaching standards. This course will include practical applications of methods and materials used in class. A field component is required.

Prerequisites

Admission to SOE, ED 3700

, ED 3900

ED 4220 - Language Arts in the Context of Childhood Education

Credits: 4

This course explores reading and writing in discipline-specific areas including English Language Arts, Science, Social Studies, and Mathematics for students in the upper elementary grades (3-6). The course places a strong emphasis on disciplinary and interdisciplinary uses and purposes for oral and written texts and includes research-based models for integrating reading and writing across the curriculum. To support the goal of student comprehension, the course emphasizes: (1) various forms of assessment to measure progress and plan instruction, (2) supporting vocabulary acquisition through word work, (3) the use of strategy-based and interactive methods and materials for the upper elementary classroom, and (4) the implementation of multiple texts to support instruction in English Language Arts and in other disciplines.

Prerequisites

Admission to SOE, ED3700, ED3900, Co-requisite: CE 4200

When Offered:

Fall

Spring

ED 4221 - Teaching Literacy in Multilingual Settings

Credits: 4

In this course, participants critically examine the underlying theories and research-based literacy teaching and assessment practices for multilingual learners who are developing literacy in more than one language. Participants will design literacy instruction across the curriculum for children in their first language and English as a new language for students from birth through grade six guided by the research-based building blocks of literacy commonly referred to as the Science of Reading. Through active engagement with multicultural and multilingual children's literature participants gain an understanding of the role of this literature in language and literacy development in children's home and new languages.

Prerequisites

Admission into the School of Education; ED 3700; ED 3900

When Offered:

Fall

Spring

ED 4225 - Literacy for Diverse Learners

Credits: 4

This course is designed to help teachers develop an understanding of the theory, research, and practice of teaching reading and writing in PreK-12th grade classrooms with an added emphasis on the intersection with special and bilingual education. The main goals of the course are: to gain an understanding of how students develop as listeners, speakers, readers, and writers-cognitively, socially, linguistically, culturally; become familiar with a variety of instructional practices that support young literacy learners; and, develop a working knowledge of assessment-driven literacy instruction. In addition, several critical topics and themes are foundational to the course: high leverage practices for special education and multilingual learners; valuing cultural diversity; exploring genre and author studies; and, developing literacy curricula for democratic classrooms. There are 15 fieldwork hours required as part of this course.

ED 4230 - Reading Across the Curriculum

Credits: 4

This course focuses on current approaches to literacy instruction across the curriculum. It is designed for secondary teacher candidates, and addresses specific instructional strategies appropriate for the adolescent population. Emphasis will be placed on theoretical models of reading, instructional strategies, assessment techniques, strategies specific to multicultural and bilingual learners.

Prerequisites

Admission to SOE, ED 3900

Corequisite ED4231**Prerequisite/Corequisite**

ED4231, ED3900

When Offered:

Every semester.

ED 4231 - Reading Across the Curriculum Practicum

Credits: 2

The purpose of this course is to provide adolescence and middle childhood education candidates with an opportunity to observe literacy strategies in various discipline settings. The course goal is to familiarize candidates with differentiation of instruction and methodology for diverse / multicultural populations. Candidates will also become familiar with the strategic needs of learners with exceptionalities. Candidates will observe students in a bilingual and/or ESL classroom, and maintain a reflective journal. Field experience is required.

Prerequisites

Admission to SOE; ED 3900**Corequisite** ED4230**Prerequisite/Corequisite**

ED4230, ED3900

ED 4250 - Linguistics for Language Educators

Credits: 4

Linguistics for Language Educators focuses on building knowledge related to the ways in which languages work in teaching and learning. This course will benefit language educators of all kinds including bilingual, world language (i.e. Spanish Education at the elementary or secondary level), English-for-Speakers-of-Other-Languages (ESOL) and any teacher in a mainstream or special education classrooms with students designed as English Learners (ELs). This course covers theories of language acquisition and linguistic components of language and provides educators with opportunities to explore how current theories and practices in the field of linguistics are relevant to second language teaching and learning. The course provides an overview of theories of language acquisition, linguistics, sociolinguistic and psycholinguistic analyses and how these pertain to language proficiency and academic achievement for students learning language in U.S. schools. Course topics include phonology, morphology, syntax, pragmatics, semantics, sociolinguistics, linguistic anthropology, language variation, language acquisition (first, additional, simultaneous in more than one language), written language, language processing, nonverbal components of language and comparative linguistics for English and Spanish

Prerequisites

Admission to SOE, ED 3700

, ED 3900

ED 4255 - Language Development and Instruction for Diverse Learners

Credits: 4

This course is designed to prepare pre-service teachers for instruction in reading and writing for Birth through 12th-grade students with a focus on students with exceptionalities. Teacher candidates will gain knowledge of pedagogical theories for reading and writing development and evidence-based instructional strategies for students across disciplines and settings. The development of language and learning will be explored, as well as a balanced and integrated language arts curriculum, including collaboration with professionals. Additionally, this course will provide essential methods for teaching and assessing reading and writing for Pre-K students through 12th grade with an understanding of the influence of individual experiences and socio-cultural/political contexts on literacy learning and its assessment. 10 hours of field experience required.

Prerequisites

ED 3800, ED 3820, ED 3900ED 3900 - Foundations of Education

ED 4280 - Methods and Materials for Teaching Mathematics and Sciences to Diverse Students

Credits: 4

In this course candidates will learn different methods and materials for teaching and modifying instruction in mathematics, sciences, and technology for diverse students in Birth -12th grade classrooms. It will provide a forum for the discussion of different issues associated with the field of learning disabilities and special education. More specifically students will have the opportunity to examine a wide range of effective age-appropriate instructional technology and accommodative strategies for teaching different areas of the curriculum including mathematics, sciences, technology, and study skills. Students will also have the opportunity to present, discuss, question and exchange ideas that will contribute to our overall understanding of teaching and learning, and at the same time will further the discourse and dynamics in the field of education. In the process of learning about all these important topics we will all reflect on our experiences as learners and use this valuable resource to inform us with technology-infused teaching practice. Diagnostic, remedial, and evaluative strategies will also be examined, as well as methods of instruction aligned with the New York State Learning Standards and adapted for diverse student

populations. Additionally, the course is structured to enhance the development of critical thinking, and problem solving with an emphasis on how technology can be used to increase student achievement and engagement to develop the teacher-as-practitioner. 10 hours of field experience required.

ED 4300 - Assessment, Evaluation, and Evidence-based Decision Making in Special Education

Credits: 4

The purpose of ED 4300 is to provide pre-service teachers with skills needed to use assessment data to make diagnostic and instructional decisions for students classified with disabilities from birth through 12th grade. Pre-service teachers will learn how to determine students' strengths and areas of need by monitoring student progress across disciplines and settings, conducting error analyses, conducting norm and criterion-referenced assessments, and using assessment results to develop Individualized Educational Programs (IEPs) and Individualized Family Service Plans (IFSPs). In addition, pre-service teachers will understand Response to Intervention (RTI) and Multi-Tiered Systems of Support (MTSS), and determine students' responses to individualized educational interventions and plans using data. The process and purpose of evaluations and data collection leading to the 13 classifications and classification of Preschool Child with a Disability will be explored, including collaboration with family and professionals. Teacher candidates will explore biases and their influence on assessment connected to students' socioeconomic and cultural differences. 10 hours of field experience required.

Prerequisites

ED 3800, ED 3820, ED 3900

When Offered:

This course is offered every semester.

ED 4670 - Methods and Materials of Teaching English as a Second Language

Credits: 4

This course will prepare pre-service teachers to make connections between theory and methodology for the teaching of English as a Second Language in bilingual classrooms. The course will emphasize the needs of English learners (ELs) in academic instruction, with a focus on language and literacy integration throughout the curriculum, content-based ESL, and reading and writing strategies for English language learners. The course will provide interactive exploration of research-based ESL classroom practices. Field experience required.

Prerequisites

ED3800, ED3900, ED3820

ED 4810 - Positive Behavior Supports and Interventions for Students with Disabilities

Credits: 4

This course is designed to provide students with an understanding of the theoretical foundations of both classroom management and behavior, and focuses on a wide range of proactive and preventative approaches to supporting positive student behavior. Additional course topics include the application of evidence-based approaches to addressing challenging behaviors in Birth through Grade 12 classroom settings, including the collection & analysis of student behavioral data, and the creation function-based behavioral interventions to engage and support students who exhibit challenging behavior. The course involves a practicum experience in a class serving at least one student with emotional or behavioral disorder. During their practicum experience, students conduct a functional behavioral analysis (FBA) and implement a behavior intervention plan (BIP) to support a focal student's challenging behavior. The overarching goal of the course is to equip pre-service teachers with a variety of practical, evidence-based strategies that are effective in promoting positive student behaviors and addressing challenging Birth through Grade 12 classroom behaviors and situations. 10 hours of field experience required.

Prerequisites

ED 3800, ED 3820, ED 3900, ED 4225, ED 4250, ED 4280, ED 4300ED 3820 - Foundations of Special Education

When Offered:

This course is offered every semester.

ED 4850 - Instructional Design & Delivery for Diverse Learners

Credits: 4

The purpose of this course is to provide pre-service teachers with conceptual and application knowledge of instructional design and delivery in English Language Arts and Social Studies for students with exceptionalities and all learners. Focus will also be placed on students' areas of strengths and needs, and how these inform the choice and application of instructional methods such as scaffolds, differentiation, and Universal Design for Learning for learners. This course will

also cover research-based instructional strategies and skills and their implementation for enrichment and remediation for students classified with disabilities across disciplines and settings to include inclusion and self-contained/special classes. Preservice teachers will acquire an understanding of pedagogical strategies for students with disabilities from birth through grade 12 and their connection to students' socioeconomic and cultural diversity. This course is required for all Exceptional Education and Learning majors. 10 hours of field experience required.

Prerequisites

ED 3800, ED 3820, ED 3900, ED 4225, ED 4250, ED 4280, ED 4300ED 3820 - Foundations of Special Education

ED 4890 - Students with Neurodevelopmental Disabilities and Special Health Care Needs

Credits: 4

This course is focused on the collaborative practices that enable individuals with neurodevelopmental disabilities and other health care needs to reach their maximum potential and lead meaningful lives. It explores issues related to assessment and treatment of children with, or at risk for neurodevelopmental disabilities and their families. Students examine current and historical experiences of learners with developmental disabilities, and analyze different theoretical underpinnings related to teaching this population of learners from birth through adolescence. Additional foci include: early intervention, family partnerships, advocacy, evidence-based instructional practices, and transition planning, with a special focus throughout the course on Autism Spectrum Disorder (ASD). 10 hours of field experience required.

Prerequisites

ED 3800, ED 3820, ED 3900, ED 4225, ED 4250, ED 4280, ED 4300

When Offered:

This course is offered every semester

ED 5600 - Spanish and Methods of Teaching in the Content Areas for Bilingual Teachers

Credits: 4

This course intends to provide pre-service teachers with opportunities to listen, speak, read and write Spanish in the academic contexts of the different content areas. The academic language necessary to teach in each content area will be practiced within the exploration and discussion of best practices and methods to teach content in a bilingual classroom.

Bilingual children's literature will be introduced and used throughout the course. Active participation in both preparation for class and in-class discussions will aid in the development of the language skills needed to effectively teach lessons in Spanish. Pre-service bilingual teachers will improve various aspects of Spanish writing including grammar, phonetics, spelling, composition, and vocabulary in the context of the topics addressed in this course. Field experience required.

Prerequisites

ED 3700 - Child Development

ED3800, ED3900, ED3820

ED 5890 - Observation, Practicum, and Seminar

Credits: 4

This course provides an opportunity for middle childhood and adolescence education majors to experience the school environment prior to student teaching. Candidates spend 100 hours in schools for the purpose of observation of instruction and other school activities, interaction with children and teachers, and reflection. This course is taken in conjunction with a Methods in Teaching course, and is conducted under the supervision of a university supervisor. Students participate in a weekly seminar.

Prerequisites

Admission to SOE, formal application required, ED3900**Prerequisite/Corequisite**

ED3900

When Offered:

Spring Semester

ED 5900 - Student Teaching in Secondary School and Seminar (Grades 7-12)

Credits: 12

This is the capstone student teaching experience for candidates seeking certification in adolescence education in biology, chemistry, mathematics, social studies and Spanish. This course provides an opportunity for candidates to apply knowledge and skills developed in coursework under the guidance of a university supervisor and cooperating teacher. This course is a full-time commitment, with half the semester spent at grades 7-9 and half at grades 10-12. Students

participate in a weekly seminar.

Prerequisites

Admission to SOE, formal application required, ED3900, ED 4083

, ED 4085

or ED 4086

with a minimum grade of "B"

ED 5910 - Student Teaching in Middle School and Seminar, Grades (5-9)

Credits: 12

This is the capstone student teaching experience for candidates seeking certification in middle childhood education in biology, chemistry, mathematics, and Spanish. This course provides an opportunity for candidates to apply knowledge and skills developed in coursework under the guidance of a university supervisor and cooperating teacher. This course is a full-time commitment, with half the semester spent at grades 5-6 and half at grades 7-9. Students participate in a weekly seminar.

Prerequisites

Admission to SOE, formal application required, ED3900, ED 4082

, ED 4083

, ED 4085

or ED 4086

with a minimum grade of "B"

ED 5925 - Teaching Linguistically and Culturally Diverse Students

Credits: 4

The course is designed to prepare early childhood and elementary teachers to acknowledge and incorporate the valuable cultural and linguistic resources of the diverse children enrolled in U.S. schools to enrich the schooling experiences of all children. The course will provide an overview of applied linguistics, theories of second language acquisition, and culturally sustaining pedagogies. Teacher candidates will employ research-based planning, instruction, and assessment strategies to meet the needs of English learners and other diverse children enrolled in mainstream classrooms.

When Offered:

Fall

Spring

ED 5926 - Current Topics in Bilingual Education

Credits: 2

This course will provide a historical overview of bilingual education in the U.S. as well as exploration of the current policies and programs for bilingual learners. Time will be dedicated to exploring the bilingual populations as well as important sub-groups within it including newcomers, SIFE, and bilingual students enrolled in special education programs. This course will focus on ways that teachers and schools can acknowledge and incorporate the valuable cultural and linguistic resources of bilingual children, their families and their communities to enrich the schooling experiences of emerging bilingual children. Field experience required.

Prerequisites

ED3800, ED3900, ED3820, ED4850

ED 5930 - Internship: Meeting the Needs of Diverse Learners

Credits: 4

This course is the first of two fieldwork experiences required for Special Education majors in their senior year. The course provides opportunities for pre-service teachers to apply the knowledge and skills developed in coursework to a classroom setting that supports children with disabilities. Students are assigned to area schools for 100 hours. Students are also required to participate in weekly seminar sessions.

Prerequisites

Admission to SOE, ED 3820

, ED 4850, Senior Standing, Approval of SOE program advisor

When Offered:

This course is offered every semester. This course may only be repeated once.

ED 5940 - Student Teaching and Seminar

Credits: 12

Student Teaching and Senior Seminar is the final student teaching field experience required of Teacher Education majors. The course provides opportunity to refine and reflect upon the knowledge, skills, and attitudes needed to become effective elementary school teachers. Students are assigned to area schools and are required to student teach 5 days a week for 15 weeks. Students are also required to participate in seminars in certification preparation sessions.

Prerequisites

Completion of all course work and approval of SOE program advisor Grade of "B" or better required

When Offered:

Every semester. This course cannot be repeated

ED 5940B - Student Teaching & Seminar - Bilingual

Credits: 12

Student Teaching and Senior Seminar is the final student teaching field experience required of Teacher Education majors. The course provides opportunity to refine and reflect upon the knowledge, skills, and attitudes needed to become effective elementary school teachers. Students are assigned to area schools and are required to student teach 5 days a week for 15 weeks. Students are also required to participate in seminars in certification preparation sessions.

Prerequisites

Completion of all course work and approval of SOE program advisor Grade of "B" or better required

When Offered:

Every semester. This course cannot be repeated

ED 5960 - Student Teaching & Seminar in Diverse Classrooms: Teachers as Leaders/Advocates for All Students and their Families

Credits: 6

Student Teaching is the final student teaching field experience required of Teacher Education majors. The course provides an opportunity to refine and reflect upon the knowledge, skills, and attitudes needed to become effective elementary school teachers. Students are assigned to area schools and are required to student teach 5 days a week in two rotations for a total of 15 weeks within two grade levels (PreK-6 and 7-12). Students are also required to participate in weekly seminar sessions with the University Field Supervisor. ED 5960 is offered every semester. 70 days of student teaching experience required.

Prerequisites

Admission to TED; successful completion of ED 5930; approval of TED faculty advisor and Director of Field Experience; Senior Standing.

ED 5960B - Student Teaching & Seminar - Bilingual

Credits: 6

This is the first half of the final student teaching experience for students seeking dual certification as elementary and special education teachers. The course provides opportunities for students to refine and reflect upon the knowledge, skills, and attitudes needed to become effective elementary school teachers. Students are assigned to selected area schools and required to student teach 5 days a week for 15 weeks. Students are also required to participate in weekly certification preparation sessions. This course cannot be repeated

Prerequisites

Completion of all course work and approval of program advisor Grade of "B" or better required

ED 7019 - Trends and Issues in High Incidence Disabilities

Credits: 3

This course explores current trends, issues and best-practices in working with PreK-12th grade students with high incidence disabilities. Topics with an emphasis on evidence based strategy instruction, behavioral intervention and curriculum resources will be addressed. The purpose of this course is to provide pre-service teachers with the skills and knowledge required for teaching students with high-incidence disabilities (LD, ADHD, EBD, Communication Disorders, and Mild Intellectual Disabilities) in inclusive settings. Characteristics of students in high-incidence disability categories, current special education mandates, and trends and issues will be discussed. Students will identify, select, and

demonstrate appropriate teaching strategies, technology, and behavioral support for individuals with high incidence disabilities in various PreK-12 situations. The is a 15-hour field component is required for this course.

Prerequisites

, , , and

ED 7020 - Methods of Instruction for Students with Low Incidence Disabilities

Credits: 3

This course focuses on the characteristics and issues encountered by PreK-12th grade individuals with low incidence disabilities. Characteristics addressed include learning, behavioral, social-emotional, and communicative abilities. Special emphasis is placed on implementing evidence-based practices and empirically supported treatments.
Students will identify, select, and demonstrate appropriate teaching strategies, technology, and behavioral support for individuals with low incidence disabilities in various PreK-12 situations. There is a 15-hour field component is required for this course.

Prerequisites

, , , , and

ED 7021 - Collaborative Leaders in Special Education

Credits: 3

Description: This course provides methods of collaboration in PreK-12th grade special and general educational settings. All aspects of professional collaboration and the interface among general and special educators are highlighted. Relationships with related service providers as well as parents and external agency personnel are explored with the focus on PreK-12th grade students with exceptional needs in inclusive settings. Inclusive practices through evidence-based frameworks are selected with research-based instructional strategies to effectively co-teach in classrooms with students with diverse needs. There is a 15-hour field component is required for this course.

Prerequisites

, , , , , , and .

ED 7022 - Interventions in Reading for Students with Exceptionalities

Credits: 3

This course will review evidence-based strategy instruction to better understand instructional methods and theories to help PreK-12 students who struggle with literacy to read for understanding and to write for communication of ideas. Theories of literacy skill development and individual learning styles are examined in the context of various difficulties encountered in mastering literacy skills. Interventions utilizing a strength-based approach within the framework of the principles of Universal Design for Learning for all aspects of literacy acquisition are addressed across various PreK-12 settings. There is a 15-hour field component is required for this course.

Prerequisites

ED 7001, ED 7002, ED 7003, ED 7004, ED 7005, and ED 7019

ED 7023 - Math, Science, and Technology for Students with Learning Difficulties

Credits: 3

This course provides enhanced application for curriculum development, instructional planning, and validated instructional strategies for teaching math, science, and technology to PreK-12 students with diverse learning. The uses of assistive and instructional technology for students with exceptional needs are specifically addressed. Students will identify, select, and demonstrate appropriate teaching strategies for individuals with exceptionalities in various PreK-12 situations. There is a 15-hour field component is required for this course.

Prerequisites

ED 7001, ED 7002, ED 7003, ED 7004, ED 7005, ED 7019, ED 7021, and ED 7022

ED 7026 - Student Teaching/Final Practicum & Seminar

Credits: 6

This course provides a supervised student teaching practicum/research project as the required capstone course for the degree. The practicum provides the candidates with an opportunity to teach PreK-12th grade learners with exceptionalities in a school setting under the direction of a cooperating teacher and a college supervisor. For those students initially certified in special education, an individual research project may be substituted under the direction of the student's advisor.

Prerequisites

ED 7001, ED 7002, ED 7003, ED 7004, ED 7005, ED 7019, ED 7020, ED 7021, ED 7022, and ED 7023

Contract All Courses |
