Politics, Economics and Law

PE 1600 - People, Power, Politics

Credits: 4

An introductory course that begins with an examination of the nature of power in different areas of human experience, and then proceeds to look at power issues related to lawmaking, governmental institutions, and political participation both inside and outside of those institutions. The course is intended to illustrate the various sources of power that people possess to bring about political and social change. It draws on current events in order to better illustrate the topics discussed.

Prerequisites

EC I

When Offered:

Periodically.

PE 1650 - Politics of Comics

Credits: 4

This course explores the art form and the politics of comics in terms of how they are produced and by whom, as well as the texts themselves and how they are received. It encompasses comics of various genres of fiction (superhero, horror, slice-of-life, humor, science fiction, etc.) as well as nonfiction. Topics include immigration and religion, sex discrimination and feminist movements, racial discrimination and civil rights movements, war and post-traumatic stress, disability and monstrousness, class and privilege and vigilantism, sexuality and gender, and adolescence and identity.

Note:

Cross-listed as WS 1540 - duplicate all course information incl. pre-reqs, gen eds, course description.

PE 2300 - Introduction to Law

Credits: 4

This course is intended to familiarize students with the basic substantive, procedural, and structural components of the legal system of the United States of America. This course provides an introduction to the common law and the essential characteristics of the United States legal system: basic constitutional structures and the judicial function, the basics of legal methodology, the role of the legal profession in an adversary system and a survey of core legal principles in different areas of the law.

Prerequisites

EC I

When Offered:

Every semester.

PE 2420 - Principles of Microeconomics

Credits: 4

An introduction to neoclassical economic theory. Consumer and producer behaviors, price formation in the market and the role of the market in allocating resources and coordinating social production are among the topics covered.

Prerequisites

ECI

When Offered:

Every semester

PE 2430 - Principles of Macroeconomics

Credits: 4

An introduction to conventional macroeconomic theory, including the determination of national income, government taxing and spending policy, money and banking, unemployment, and inflation.

Prerequisites

EC I

When Offered:

Every semester

PE 2650 - Introduction to U.S. Politics

Credits: 4

This introduction to power and politics in the U.S. explores the Declaration of Independence and the Constitution; public opinion, interest groups, social movements, and voting; the institutions of Congress, the Presidency and the Supreme Court; and the making of current policies. Emphasis is placed on issues of power, democracy, and political and social change.

Prerequisites

EC I

When Offered:

Every semester.

PE 3000 - Introduction to Urban Issues

Credits: 4

An examination of various perspectives on urban areas and of important urban issues, including social problems of minority communities, housing and public services.

Prerequisites

EC I

When Offered:

Periodically

PE 3100 - International Relations

Credits: 4

This course introduces students to basic concepts and theories of international relations. Particular focus is given to historical patterns of continuity and change in world politics and the evolution of world orders, including great power relations, geopolitics, and, thus, the evolution of international institutions and international law. The course explores how each individual is related to global politics and encourages students to study and propose solutions to issues related to war and peace, including foreign policy, national security and national interests versus international law.

Prerequisites

ECII

When Offered:

Every semester.

PE 3155 - Model United Nations

Credits: 4

The course prepares students for a Model United Nations conference where students perform the role of a diplomat from an assigned country. Students acquire a working knowledge of the United Nations, a familiarity with current issues on the international agenda, an in -depth knowledge of an assigned country, an unparalleled experience in conducting primary research, and practice with negotiation and public speaking.

Prerequisites

EC11 and instructor's approval

When Offered:

Every spring semester.

PE 3160 - Ethnicity and Race in Global Perspective

Credits: 4

This course explores identity politics across the world focusing on ethnicity, race, and nationalism. We will survey theories of identity and examine their contemporary practices. Topics include nation-building and state-building; identity, imperialism, and anti-imperialism; identity politics and conflict; and multiculturalism.

Prerequisites

EC II

When Offered:

Periodically

PE 3201 - Statistics

Credits: 4

Surveys the basic topics of modern statistics, including descriptive statistics, probability theory, probability distributions, hypothesis testing, simple regression.

Prerequisites

MA 1020

PE 3220 - United States Economic History

Credits: 4

This course provides a comprehensive introduction to the economic history of the United States. It covers the development of the U.S. economy from colonial times through the neoliberal counterrevolution. Topics include settler colonialism, slavery, proletarianization, industrialization, class conflict, crisis and more.

Prerequisites

None**Corequisite** None**Prerequisite/Corequisite**

None

When Offered:

Other**Note:**

None

PE 3240 - Inter-American Relations and Immigration

Credits: 4

This course examines the political, economic, and social processes that shape foreign policies and international relations in the Western Hemisphere, and the consequences of those policies and relationships for the peoples of the hemisphere. The main themes include manifest destiny, imperialism, the Cold War, neoliberalism, and inter- American immigration.

Prerequisites

ECII

When Offered:

Every other Spring.

PE 3250 - Topics in Latin American Politics

Credits: 4

This course examines the political and economic similarities and differences in subregions of Latin America (such as the Spanish-speaking Caribbean, Central America, Andean nations). It explores the shared histories and particular experiences in domestic development, international relations, and integration in the global economy, and analyzes contemporary debates on a wide range of issues including inequality, authoritarianism vs. democracy, population migrations, and the impact of climate crisis. Subregions and themes vary and are announced at the time the class is posted for registration.

Prerequisites

EC II

When Offered:

Periodically.

PE 3400 - Global South

Credits: 4

Analysis of major political, economic and social problems of the Global South (i.e. nations of Africa, Asia, Latin America, and the Caribbean). The course broadly traces the history of colonialism and considers its impact on the post-colonial political economy of the Global South. Case studies may complement the general analysis.

Prerequisites

ECII

When Offered:

Every semester

PE 3410 - Contemporary U.S. Political Economy

Credits: 4

This course is designed to familiarize the student with the workings of the economy within a class and institutional context. Focuses on the economic history of the United States from the perspective of competition between firms, management/worker relations and the involvement of the state in the economy.

Prerequisites

ECII

When Offered:

Every semester.

PE 3425 - Intermediate Microeconomics

Credits: 4

An in-depth study of price theory. Develops and redefines the neoclassical principles presented in PE 2420

. Emphasizes the application of economic theory to public policy making.

Prerequisites

PE 2420 (minimum C-)

When Offered:

Every semester

PE 3435 - Intermediate Macroeconomics: Theory and Policy

Credits: 4

This course surveys short-run macroeconomic theories and stabilization policies in five parts.

Part I presents and critiques the principal non-Keynesian theories of output and employment, including the classical model, the monetarist model, and the rational expectations and real business cycle models.

Part II develops the simple Keynesian model of output and employment.

Part III extends the Keynesian model by incorporating money, monetary policy, and the analysis of depression economies.

Part IV applies the Keynesian framework to open economy macroeconomics, examining the international transmission of booms and busts across countries.

Part V concludes with a comparative analysis of the global spread of the Great Recession (2007-2010) from the United States to ten other major economies.

Prerequisites

PE 2430

When Offered:

Every spring

PE 3440 - International Economics

Credits: 4

The focus of this course is international trade theory and policy. It covers as well certain fundamental aspects of international monetary economics. The curriculum is designed to provide students with the basic skills required for an understanding and critical analysis of the principal global economic issues facing the United States and the world today.

Prerequisites

PE 2420

or PE 2430

When Offered:

Periodically.

PE 3450 - Women from a Global Perspective

Credits: 4

This course examines the various roles of women in the global economy, with particular emphasis on the international division of labor. It provides a class, ethnic and historical analysis of the study of women as part of economic and social change. Case studies of women in advanced capitalist and Third World nations show their increasing interactions.

Prerequisites

ECII

When Offered:

Periodically.

PE 3470 - Economics of Sports

Credits: 4

This course examines the economics of professional sports and sporting activities, and their role in regional economic growth. The focus of the course is on practical applications of economic theory to problems related to these industries. Students are expected to be able to define key concepts as well as demonstrate the ability to use analytical tools to solve problems illustrative of issues related to sports and sports industry concerns such as: Identify the basic economic factors affecting professional sports. Use rudimentary economic models to examine the economic impact of professional sports activities, and their interrelationship with other economic activities. Understand the basic methodology of economic impact analysis. Identify and explain the economic principles and problems associated with sports team ownership. Identify and explain the economic principles and problems associated with stadium economics. Explain the impact and effects of radio and television broadcast rights on team ownership and profitability.

Prerequisites

Principles of Microeconomics or Principles of Macroeconomics

When Offered:

Other

PE 3610 - Conflict and Revolution in the 20th Century

Credits: 4

Rapid changes in the global economy, the rise of 20th Century social movements as well as ethnic tensions have led to conflicts in various parts of the world. The different origins of the violence as well as the outcomes are the subject matter of this course. Case studies including the Middle East, Africa, Latin America and the Caribbean, China and the U.S. Civil Rights movements are used selectively to illustrate instances of rebellion.

Prerequisites

ECII

PE 3690 - City & Suburb: Political Action and Change

Credits: 4

A survey of city and suburban organization practices. Examines the role of the community organization in fostering local autonomy and as an agency for social, political and economic change in our cities and suburbs.

Prerequisites

ECII

PE 3720 - Long Island: Economy, Environment and Society

Credits: 4

Most Americans now live in suburban areas like Long Island. Since the Second World War and the building of Levittown, Long Island's economy has been transformed from an agricultural area to a bedroom community. Its natural amenity allowed the creation of a number of parks known world over. Since the seventies, the area has witnessed a boom in commerce and lately, of office space. The course covers the past and recent changes in this region.

Prerequisites

ECII

PE 3750 - Politics of Race and Class

Credits: 4

This course explores the intersection of race and class in the U.S., inquires into the relationship between race and quality of life, and examines limitations on the representativeness of the political system at federal, state, and local levels of government. Central to the course is the question of government responsiveness on issues of race and class. Particular attention is paid to the operation of U.S. political parties, to elections and voting, to legislative process and executive leadership, and to media performance in public debate.

Prerequisites

EC II

PE 3850 - State and Local Politics

Credits: 4

The course examines government and politics at the state and local level, with particular emphasis on New York State. It discusses issues in state and local government and the impact of the competing interests of the people of New York on public policy. It also explores the historical context and contemporary state of policy initiatives on issues such as criminal justice, welfare, health care, education, immigration, the environment and taxation.

Prerequisites

ECII

When Offered:

Periodically.

PE 3900 - Inequality and Mobility Through the Data: Empirical Methods in Social Policy

Credits: 4

This course builds on concepts across PEL majors with a focus on applying data and empirical methods to social policy. Students will gain experience working with data to explore geographic and intergenerational patterns in inequality and mobility, in both upper- and lower-income countries. Through applications of observational and experimental causal inference methods, students will learn how to identify and articulate clear policy questions, propose concrete solutions, and evaluate the effectiveness of social programs. Because the course focuses more on applications than on theory, students are encouraged to enroll even if they have not taken a course in econometrics.

Prerequisites

None**Corequisite** None**Prerequisite/Corequisite**

None

When Offered:

Other**Note:**

None

PE 4100 - International Organizations in the Global Economy

Credits: 4

This course explores various approaches to international organizations and the contribution these organizations make to the creation, maintenance, and change of world order. Current issues facing the United Nations and its specialized agencies, the Bretton Woods financial institutions, and regional organizations will be examined. While much attention is given in this course to the role of permanent, intergovernmental organizations, the course also examines the role of nongovernmental organizations, international law, treaties, and norms in international relations.

Prerequisites

Upper-Division standing

PE 4200 - Middle Eastern Politics

Credits: 4

Recent events like the terrorist attacks of September the 11th, the Persian Gulf Wars, the U.S. occupation of Iraq, the Arab-Israeli conflict, the rise of political Islam have highlighted awareness of the significance of the Middle East in world politics as well as the lack of understanding about the region in the West. This course explores the geographic,

historical, political, economic, and cultural aspects of the Middle East, covering such topics as the making of the modern Middle East, Arab nationalism, the U.S. occupation of Iraq, the Palestinian-Israeli conflict, Islam and human/women's rights, and Iran and the bomb.

Prerequisites

Upper-Division standing

PE 4275 - Applied Econometrics

Credits: 4

Builds on the knowledge and skills in statistics by the study of simple and multiple regression analysis to test empirical propositions in economics and to forecast economic time series. Students are also required to become fluent in the use of a statistics computer program.

Prerequisites

MA 2300

, MA 2310

, PE 3201

PE 4280 - Environmental Politics

Credits: 4

The course will begin by examining the crucial biophysical, economic, and social issues facing local communities and political leaders today. In the second part of the course students are brought through the history, organizations, interests groups, and processes that shape U.S. and international environmental policy. The latter will conclude with the current debates that inform policies and negotiations within such institutions as the WTO, United Nations and agreements such as NAFTA. Students will be assigned examples of communities that have confronted environmental problems and they will research the processes by which those communities addressed them.

Prerequisites

Upper-Division standing

PE 4290 - Environmental Economics

Credits: 4

This course examines issues involved in sustainable development and is designed as a broad survey covering the most critical topics in environmental economics. The significant contribution that economic analysis can make in understanding the nature of problems in sustainable development and in providing possible solutions is the central focus of the course. Market failures are the cause of many of our most serious environmental problems but can be remedied with economic tools. The role that economic and political institutions play in allocating natural resources is examined. Students are exposed to a number of emerging sustainability issues including global warming and given ample opportunities to develop their own perspective.

Prerequisites

PE 2420

or PE 2430

PE 4325 - Jurisprudence: Legal Thought

Credits: 4

This course is a survey of major theoretical approaches to the nature, purposes, interpretation, and practice of law. Through primary classical and contemporary documents, we will explore “classical” legal philosophies such as natural law and legal positivism, as well as the more “modern” theories of American legal thought: legal realism, law and society, feminist legal theory, critical race theory, and queer legal theory.

Prerequisites

Upper-Division standing

PE 4409 - Urban Economics

Credits: 4

This course examines the evolution of cities and metropolitan areas as centers of production and the relationship of urban economics to regional, national, and international economics. Attention is paid to the failure to meet the needs of significant numbers of people in urban areas.

Prerequisites

Upper-Division standing

When Offered:

Periodically.

PE 4430 - Health Economics

Credits: 4

Health Economics provides a broad overview of healthcare delivery and finance systems, both in the U.S. and abroad, and explores the role that economic theory plays in the national healthcare reform debate. The student will be introduced to a number of basic theoretical tools used in economics to explain the allocation of scarce resources in healthcare markets. The course will also explore a number of controversial questions involving the rationing of care, “market failures” in the current healthcare system, disparities in access to care, and the extent to which recent healthcare reform legislation addresses these issues.

Prerequisites

Upper Division Standing

PE 4440 - Food and Wine Economics

Credits: 4

The purpose of this course is to provide students with a systematic introduction to basic economic concepts and issues as they relate to the food and wine industry. The process requires an understanding of the microeconomic and macroeconomic forces influencing the decisions of producers and consumers. Topics include supply and demand of food and wine, food and wine production function, both under perfect and imperfect competition as well as an introduction to behavioral economics. The course also addresses concepts in natural resources such as the tragedy of the commons and externalities, as well as government programs.

Prerequisites

PE 2420

PE 4450 - The Politics of Gender and Sexuality

Credits: 4

This course examines how constructed norms of "gender" and "sexuality" have shaped our identities, our opportunities, our media representations, and our laws, and how we can re-construct those norms to make change in these areas as well. We will explore topics such as child rearing and abortion, non-marital sex, work and income, sexual harassment, interpersonal violence, sexual assault, and dating and marriage. We will investigate how
women, people of color, people who are working class or in poverty, people who identify as LGBTQ+, and people who are unmarried have been particularly subject to discrimination in these areas, and how movements for equality have challenged this discrimination and pushed for social justice.

Prerequisites

Upper Division Standing

PE 4455 - Economic Development

Credits: 4

A comparative study of economic development strategies and problems of Third World countries. The course will locate the application of development strategies in different institutional and political settings. The implication of debt repayment on economic development will also be examined.

Prerequisites

PE2420 or PE2430.

PE 4460 - International Finance

Credits: 4

Surveys three areas: international financial markets; open-economy macroeconomics; and international monetary systems and policy. Specific topics include position taking, arbitrage, parity conditions, international banking, monetary and fiscal policy, capital mobility, fixed and flexible exchange rates, the gold standard, Bretton Woods, and the current "free market" international monetary order.

Prerequisites

PE 2430

PE 4470 - History of Economic Thought

Credits: 4

This course traces the evolution of economic thought from the sixteenth century to the emergence of modern economics in the twentieth century. It examines seven major schools and representative thinkers whose ideas shaped the foundations of economic analysis:

The Mercantilists - Thomas Mun, Gerard Malynes, Charles Davenant, Jean-Baptiste Colbert, William Petty.

The Physiocrats - François Quesnay, Anne-Robert-Jacques Turgot.

Forerunners of the Classical School - Dudley North, Richard Cantillon, David Hume.

4. **The Principal Classical Economists - Adam Smith, Thomas Robert Malthus, David Ricardo.**
5. **Interpreters of the Classical Tradition - John Stuart Mill, Karl Marx.**
6. **Modern Microeconomics - William Stanley Jevons, Alfred Marshall.**
7. **Modern Macroeconomics - John Maynard Keynes.**

The course emphasizes the historical context in which these theories arose and their continuing relevance to contemporary economic analysis and policy debates.

Prerequisites

PE2420 and PE2430 or Upper Division Standing/Permission from Instructor

When Offered:

Every spring

PE 4580 - Origins of Capitalism

Credits: 4

This course explores the historical development of modern capitalism from its earliest roots to the eve of World War I. The material is organized into five parts.

Part I surveys pre-capitalist societies, tracing Western Europe's evolution from primitive communities through ancient Greece and Rome, Western feudalism, and mercantilism.

Part II examines the world of the 1780s-just before the Industrial and French Revolutions transformed economic and political life-and investigates the emergence of the "spirit of capitalism" between the fifteenth and eighteenth centuries.

Part III analyzes Adam Smith's account of the origins and nature of modern commercial society in *The Wealth of Nations* (Books I and III) and contrasts it with the Marxist class interpretation advanced by Marx and Engels in *The Communist Manifesto*.

Part IV surveys the Industrial Revolution in Britain and its diffusion to France, Germany, the United States, and Japan.

Part V concludes with contrasting interpretations of mature capitalism in V. I. Lenin's *Imperialism: The Highest Stage of Capitalism* and J. M. Keynes's *The Economic Consequences of the Peace.*

Prerequisites

PE2420 and PE2430 or Upper Division Standing/Permission from Instructor

When Offered:

Every fall

PE 4590 - Global Economy in the 20th Century

Credits: 4

This course analyzes political and economic change in selected countries of the region from the mid-twentieth century to the present. It examines the impact of foreign control over local resources, uneven capitalist development, class conflict, and the contemporary "pink tide" of new governments on poverty, inequality, and social progress.

Prerequisites

PE 3410

, or PE 2420

, or PE 2430

, or upper division standing

When Offered:

Every other Spring.

PE 4600 - Depression Economics: Lessons from the Great Depression and the Great Recession

Credits: 4

This course studies depression economics-a recently revived branch of macroeconomics that seeks to understand the causes and policy remedies for large, contagious, global collapses in output and employment. We will analyze the causes and policy remedies for depressions by comparing and contrasting the Great Depression of the 1930s with the Great Recession of 2008. The advantage of the comparative approach is that it will enable us to isolate important common characteristics of these two depressions; the circumstances that made each of these crises unique; and it can provide important lessons for thinking about how to prevent future depressions.

Prerequisites

PE 2420

or PE 2430

or Upper Division Standing

When Offered:

Every two years.

PE 4609 - Public Administration

Credits: 4

Examines organizational theories and their application in public policy. Focuses on how decisions made at various levels of government are implemented in local urban and non-urban areas. The course involves field work, visiting public offices and contacting interviews of role players in public administration case study projects.

Prerequisites

Upper-Division standing

When Offered:

Periodically.

PE 4610 - Political Power and Social Class

Credits: 4

This course analyzes the interaction of political power and social class from two vantage points–power from above and power from below. The first part of the course considers pluralist and conflict theories of the relationship between the state and society. The second part focuses on social movement theories, using cases from various parts of the world to illustrate effective challenges to entrenched political power as well as obstacles faced by people who feel excluded from institutions and structures of power.

Prerequisites

Upper-Division standing

PE 4615 - Public Finance and Public Policy

Credits: 4

Public finance (also known as public economics) analyzes the impact of public policy on the allocation of resources and the distribution of income in the economy. Government affects almost everything that we do in our daily lives, sometimes for the better, sometimes for the worse. In this course, you will learn how to use the tools of microeconomics and empirical analysis to study the taxing and the spending activities of government. Some topics covered in this class will include issues of social security, health insurance, income distribution and welfare programs, externalities and public good, and taxation.

PE 4620 - Political & Social Thought

Credits: 4

Examines significant contributions to the development of western political thought from the Greeks to the 19th century. Explores in depth works by Plato, Machiavelli, Hobbes, Locke, Rousseau, Burke and John Stuart Mill.

Prerequisites

Upper-Division standing

When Offered:

Every other semester.

PE 4650 - Topics in U.S. Politics

Credits: 4

This course examines current debates and divergent views on a wide range of economic, political, and social issues.

Prerequisites

PE 2650

or Upper-Division standing

When Offered:

Periodically.

PE 4655 - Constitutional Law and Politics

Credits: 4

This course examines the judicial branch of government as the chief interpreter of the U.S. Constitution and of the actions of the other two branches, focusing on the distribution of constitutional power among the three branches, and between the national government and the states. We will look at such issues as legislative and executive powers in wartime; whether states or the federal government can force businesses to conduct themselves in certain ways vis-à-vis their employees and customers; the limits of citizens' liberties of free speech, religious worship, and privacy; and whether public or private organizations can exclude people based on race, class, gender, or sexuality.

Prerequisites

Upper-Division standing

When Offered:

Periodically.

PE 4658 - Law and Civil Liberties

Credits: 4

This course is about your freedoms from government. It examines the historical evolution and philosophical and political underpinnings of constitutional civil liberties. We will analyze Supreme Court cases on such topics as speech, press, religion, privacy, searches, self-incrimination, counsel, trials, bail, and the death penalty-how do they affect what we can say and when and where, how we practice religion, how we make choices about our bodies, how we choose partners and form families, how we are policed and processed and punished. We will apply this knowledge to current events and policies, and assess their impact on the various groups in the United States.

Prerequisites

Upper-Division standing

When Offered:

Periodically.

PE 4659 - Law and Civil Rights

Credits: 4

This course is about your right to be treated equally. It examines the historical evolution and philosophical and political underpinnings of your civil rights. We will analyze Supreme Court cases and other writings on discrimination on the basis of race, ethnicity, gender, sexuality, class, age, and disability, and discuss such topics as desegregation, affirmative action, voting, sex, marriage, abortion, sexual harassment, immigration and citizenship, work, welfare, and education. We will apply this knowledge to current events and policies, and assess their impact on the various groups in the United States.

Prerequisites

Upper-Division standing

When Offered:

Periodically.

PE 4660 - Politics of India and the Region

Credits: 4

Introduction to the politics of selected countries in the Indian subcontinent. The course will examine the origins of the independence movements. Major emphasis will be placed on post-independence politics, social and economic change.

Prerequisites

Upper-Division standing

When Offered:

Periodically.

PE 4665 - Human Rights

Credits: 4

This course aims to provide students with a broad working knowledge of human rights as both an intellectual discourse and a realm of political action. The course examines: the emergence and institutionalization of human rights in the 20th century, human rights as a form of international politics, the difficulties in enforcing international standards as well as a

specific analysis of a number of human rights issues.

Prerequisites

Upper-Division standing

When Offered:

Periodically.

PE 4690 - Politics of Latin America and the Caribbean

Credits: 4

This course analyzes political and economic change in selected countries of the region from the mid-twentieth century to the present. It examines the impact of foreign control over local resources, uneven capitalist development, class conflict, and the contemporary "pink tide" of new governments on poverty, inequality, and social progress.

Prerequisites

Upper-Division standing

When Offered:

Every other Spring.

PE 5990 - Internship

Credits: 4

This internship will give students practical experience in the fields of public policy, legal affairs, economics as well as state and local governments. Students will be working in various public nonprofit advocacy agencies. The working hours and duration of the internship will be determined by the instructor and the agency. Students will be required to submit a journal and a portfolio of work at the end of the semester. This is an excellent opportunity for students to acquire training in their chosen area of specialization.

Prerequisites

Introductory courses in PEL and permission of the instructor

PE 9970 - New York State Assembly Session Internship

Credits: 15

This is a fifteen-credit course that takes place in Albany every spring semester. It begins the first week of January and runs through the middle of May. Students work approximately 30 hours per week in the office of a member of the New York State Assembly and take one seminar course focusing on government and politics in New York State. The State provides a stipend to assist with relocation and housing. Enrollment is by application and is competitive. Application deadline: mid-October.
